PROFILE SUMMARY

An Architect and Designer turned into a Developer. I bring a unique Front-End Development skillset combined with my background in Architecture and UX/UI Design. I have experience developing responsive, user-friendly and accessible web applications using Javascript, React, HTML, CSS, Firebase. I also created visual designs, prototypes and wireframes using Figma, Adobe Sketch and other tools. I am a creative person focused on delivering a seamless user experience.

SKILLS

Web Development: JavaScript, JQuery, React, HTML5, CSS3, SCSS, Firebase.

UX/UI Design: Figma, Sketch, Adobe XD, InVision, Photoshop, Illustrator.

Additional: AutoCAD, 3D Max, Revit.

PROJECTS

Binge Fest / API, React, JavaScript, Firebase, HTML and CSS
December 2020 - During Bootcamp

- Binge Fest provides the user with TV show choices based on genre selection and restaurant choices based on location.
- It uses three APIs (Google Map, Yelp and Open Movie Database) and Firebase to save this information.

So Serious! / jQuery, Sass, CSS and HTML
November 2020 - During Bootcamp

- So Serious is a card game. The user can play until the joker card shows up.
- There is also a Batman Mode where the game's rules change, and users need to the first joker for their first card.

EDUCATION

Web Development Immersive Bootcamp / Juno College (formerly HackerYou)
September 2020 - January 2021

Eng. Software Skills Enhancement / Humber College
